

# “Fail-Safe” Anti-Damage Mischucking System

- Available on all tire uniformity models.
- Patented “Fail-Safe” system eliminates damage to tire and machine caused by mischucked tires.
- Utilizes photoeye sensors and PLC to monitor tire position during chuck-up. Should the tire not be centered properly, the chuck retracts and rechecks the tire.
- Programmable adjustment for number of retries.
- Security of not damaging your master tires as well as optional equipment.
- Retro-fits to your existing machines.
